

# I want to specialise at Vall d'Hebron

## 2023 residents

**Become  
a member  
of our big  
family**

**575**  
residents

**150**  
tutors

**49**  
specialities

**155**  
places  
offered

You will be part of  
a **leading** national  
and international  
reference **hospital**

We are classified as a state  
reference centre in 34 CSUR  
accreditations and are a  
full member of 20 European  
Reference Networks (ERN).

You will work with  
cutting-edge  
**multidisciplinary**  
**teams**

Our commitment to teaching  
ranges from undergraduate  
and postgraduate training  
to super-specialisation. This  
involves the use of cutting-  
edge technology, many  
monographic areas and direct  
contact with other national  
and international centres.

You'll use  
**simulation** as  
a training tool

You'll develop technical and  
non-technical skills in the new  
Advanced Clinical Simulation  
Centre.

You'll be able to  
participate  
in **research** projects

We offer basic research  
training throughout the  
residency. You'll have the  
chance to complete an  
optional rotation at the Vall  
d'Hebron Research Institute,  
after which you'll be eligible  
for post-residency fellowships  
of at least one year.

**We're  
committed  
to the future**

We are a leading hospital,  
recognised as one of the best  
in Europe, where patients  
want to get treated and where  
professionals want to train and  
work.

**Silvia Ferrer Moltó** PIR

*"The residency at the Vall d'Hebron  
University Hospital allows us to  
receive training as mental health  
professionals with a focus on  
care, research and teaching. This,  
combined with the values and  
personal qualities that we develop,  
gives us access to high-quality  
health training programme and an  
opportunity to make continuous  
improvements".*

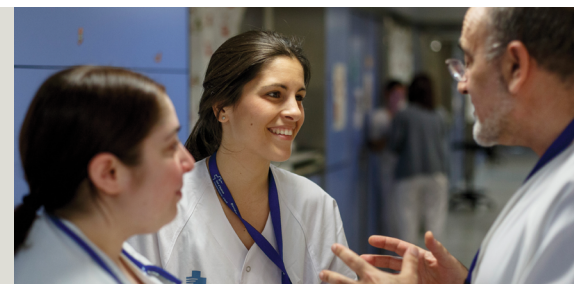

**Pablo Buck Sainz Rozas** IIR

*"Specialising in a reference centre  
that is committed to innovation in  
care and which uses pioneering  
teaching methodologies such as  
clinical simulation allows us to  
develop as professionals who  
strive for excellence".*

**Marta Barros Segura** MIR

*"The surgical residency at Vall  
d'Hebron University Hospital  
provides an opportunity to learn  
how to manage complex pathologies  
and handle any unforeseen events or  
circumstances that may arise  
in your future career. You'll learn  
how to use the most advanced  
technology in a friendly atmosphere.  
I would certainly do it again if  
I had the chance."*

**Team work**

**Leadership**

**Innovation  
and research**
